**DETAILED ACTION**

***Response to Amendment***

1. The amendment received on 04/26/04 has been reviewed and considered with the following results:

As to the rejection to the claims, under 35 U.S.C. 112, 2nd paragraph, Applicant's amendments of the claims have been considered. However, there is still indefiniteness in the claims. Therefore, an Examiner's amendment is needed as set forth below.

As to the prior art rejections, Applicant's arguments have been considered and found persuasive; and amendments have overcome the prior art rejections, as such, the prior art rejections have been withdrawn. The case is found to be in allowance condition.

**EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

3. Authorization for this examiner's amendment was given in a telephone interview with Mr. William Evans on 05/24/04.

4. The application has been amended as follows:

***In the claims***

Claim 1, line 1, "A" has been changed to --An--; and

Art Unit: 2816

line 5, "ship" has been changed to --chip--; and

Claim 1, on line 1, "The" has been changed to --An--;

### REASON FOR ALLOWANCE

5. The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest an universal clock generator circuit (as shown in Fig. 3), as recited in claim 1, comprising only one high frequency clock region (32) having only one phase lock loop (35) for generating high frequency clocks (CPU clocks, SDRAM clocks, AGP and PCI clocks), the high frequency clock region being integrated in a first chip; and specifically the limitation directed to a low frequency clock region connecting to the high frequency clock region and integrated in a second chip (31), the low frequency clock region including only one phase lock loop (33) for generating low frequency clocks (24/48/24.576/14.318 MHz. clocks), and at least one delay lock loop (34) for increasing a number of the high frequency clocks (buffer outputs) of the high frequency clock region.

Claim 15 is allowed for similar reasons.

6. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 2816
